FOX TERRIERS

This is one of a series of information features in Gold Key Comics. Collect the whole series for useful knowledge.

Fox Terriers are of two types—the Smooth Terrier whose coat is smooth and usually white, and the Wire-Haired with wiry coat.

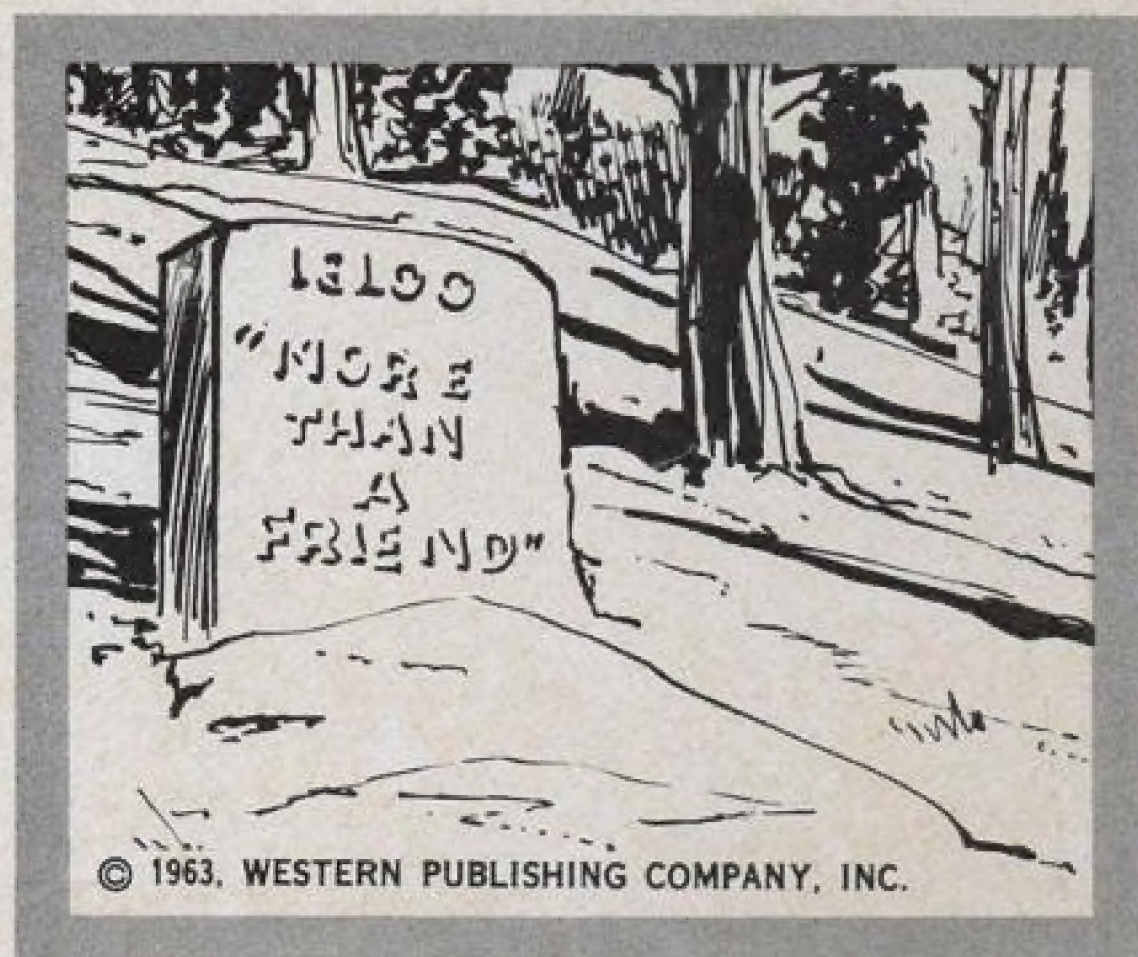

One of the best-known breeds of dogs, Terriers have great stamina and persistence. They are intelligent and very obedient.

In fox hunting, Fox Terriers were employed to run with the hounds and enter the burrow of the fox to drive it outside.

Fox Terriers make excellent pets. One of the most famous, was "Igloo", a dog that belonged to Lt. Commander Richard Byrd.

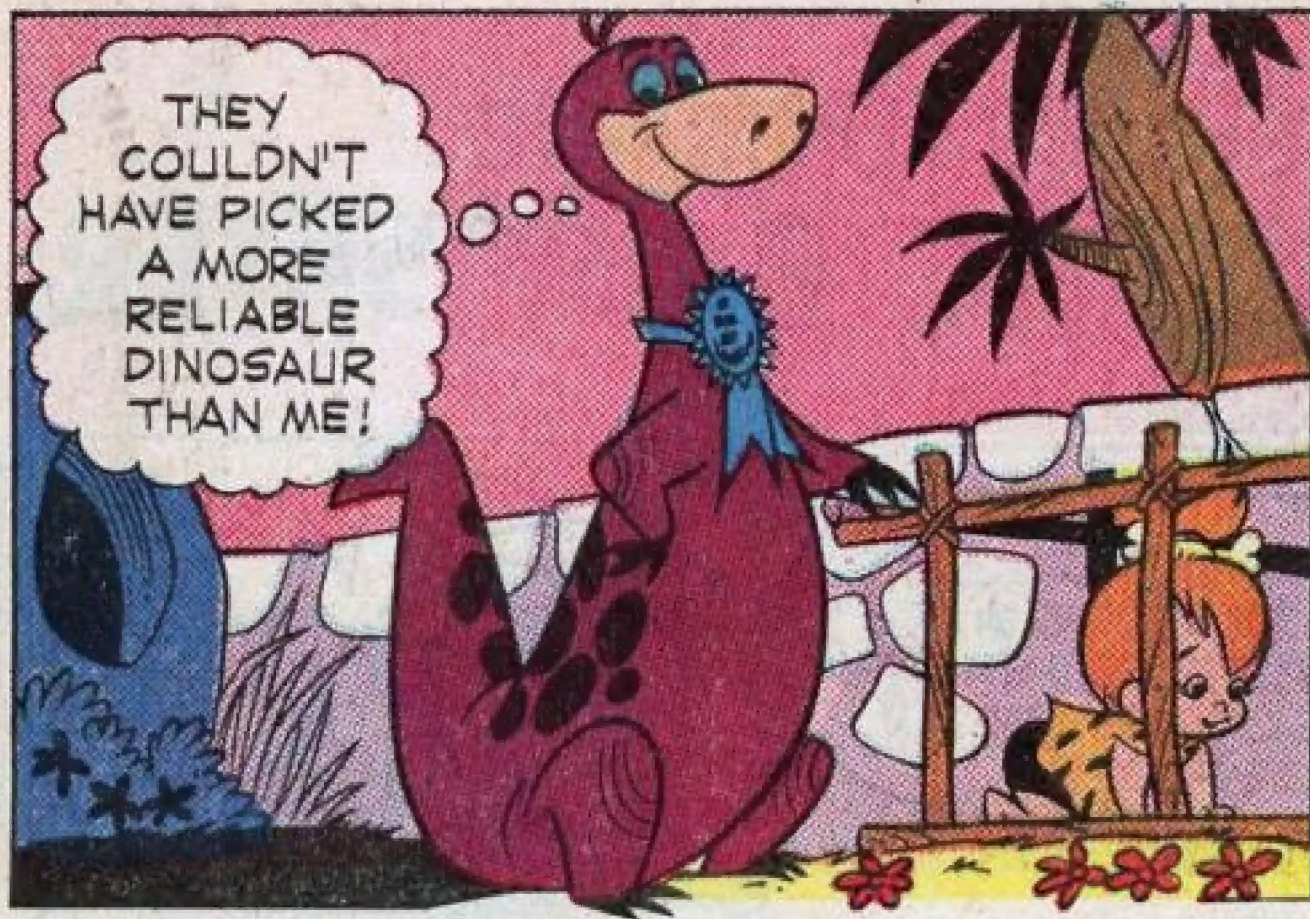

Igloo accompanied the famous explorer to the North Pole. On the dog's gravestone, Byrd had inscribed "More than a friend."

MINNOWS

This is one of a series of information features in Gold Key Comics. Collect the whole series for useful knowledge.

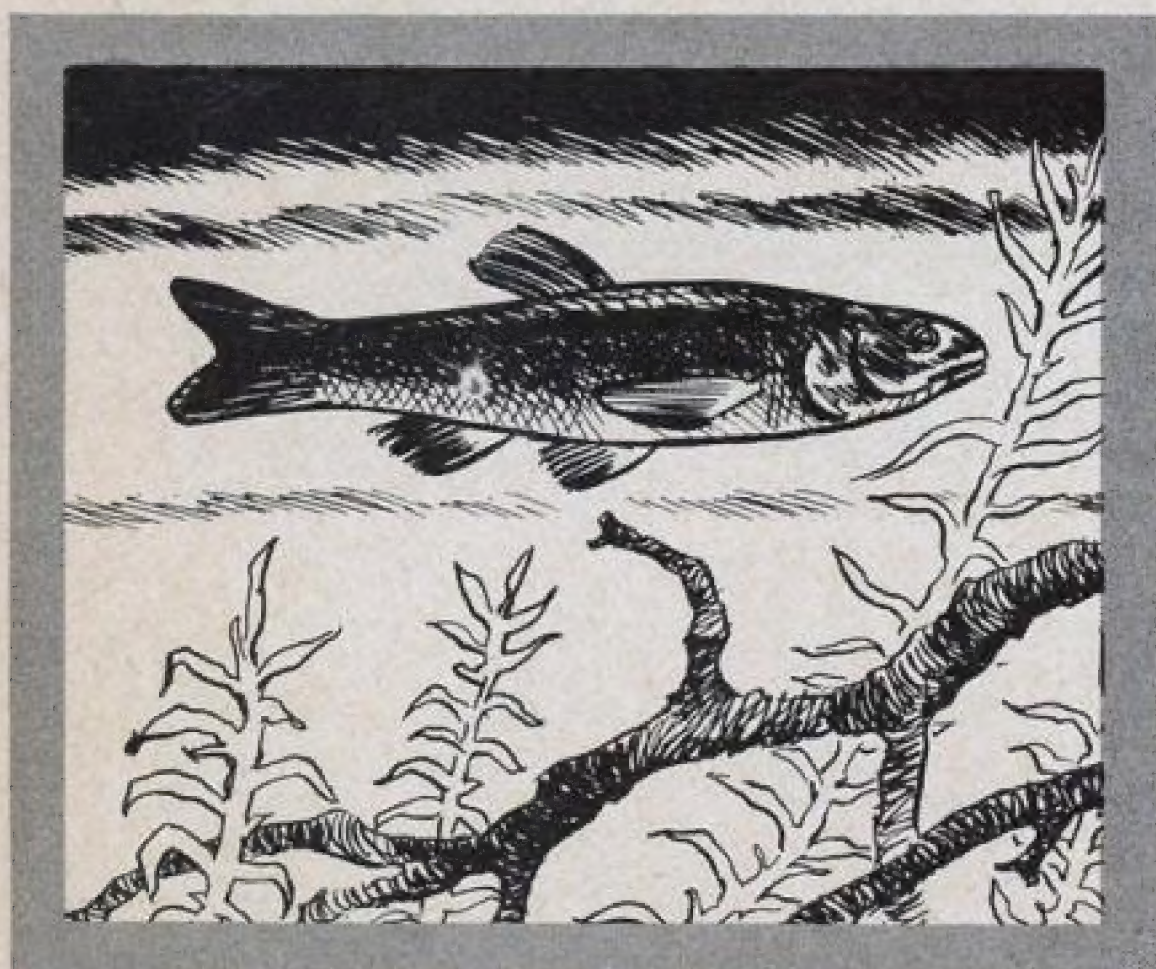

Minnows, small in size, are destined for an obscure role in life. Seldom are they large enough to interest man as a source of food.

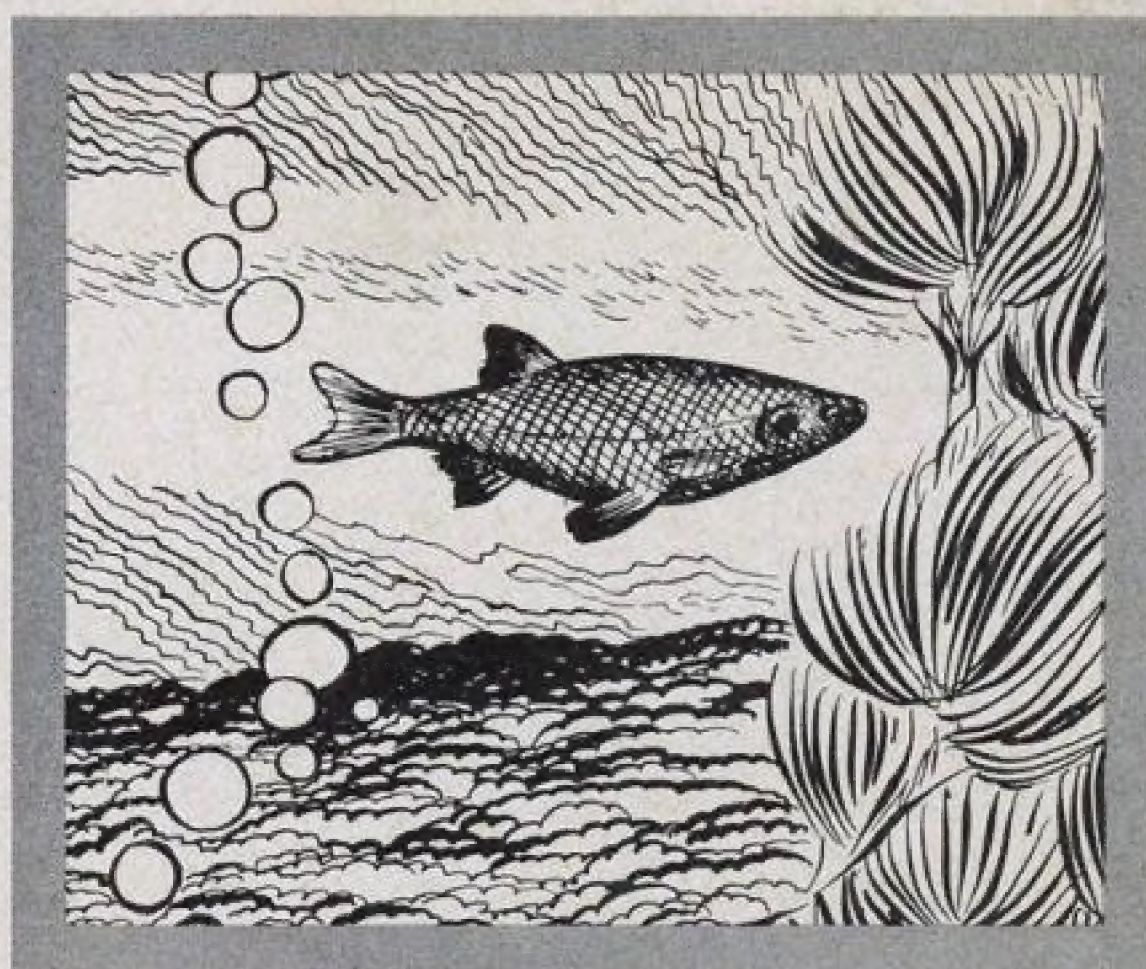

They maintain nature's balance by becoming food for larger, more valuable fish. They also are favored by fishermen as bait.

They do supply an essential link in the cycle of fresh water life. Minnows rid the waters of quantities of insects and crustacea.

The Minnow family includes Shiners, Daces, and Chubs. The Sacramento Chub is abundant in rivers of the California valley.

The Golden Shiner, a greenish minnow, becomes gold during the breeding season. It is very hardy and can survive winter in ponds.
